RELEVANT SKILLS

- HTML & CSS & JS
- Fluency in English & German
- Quality Customer Service

My Level:

Junior Software Developers are entry-level software developers that assist the development team with all aspects of software design and coding. Their primary role is to learn the code base, attend design meetings, write basic code, fix bugs, and assist the Development Manager in all design-related tasks.

My Technical skills:

Writing reports and presentations.
Collaborating with product and development teams.
Crafting an excellent customer experience.
User psychology.
Maintaining excellent relationships with clients.
Eagerness to learn and teach skills.
Strong attention to detail.

My Role:

assisting with the creation of websites and updating existing web applications using scripting languages. They work under the supervision of senior developers, assisting with coding, testing, design adjustments, and client reviews.

What is expected from me as a junior front-end developer?:

As Junior Front-End Developer at <Digital Apps> (Freelancer), I'll be responsible for building and maintaining web applications. You'll work with the development team, as well as UX/UI designers and graphic designers.

What Should You receive from me?:

I know basic programming languages, such as C++, HTML, and JavaScript. My code will be clean and maintainable and I'll understand databases and operating systems. Ideally, as a junior developer, I have basic programming experience, in the form of internships or similar.

My Experience years:

I have 2.5-3 years
